

Enhance your knowledge and understanding

of infant, child and adolescent development

- Infant and young child health essentials
- Child and adolescent health essentials

Approved as recertification programmes by the
Osteopathic Council of New Zealand

Ara

Institute of Canterbury

Ara rau, taumata rau

You'll learn how to:

- Identify and describe the stages of physical, cognitive, psychosocial and emotional development from the neonate through to adolescence
- Critically analyse the factors that affect the health of children, adolescents and families/whānau and how this may impact on their development
- Demonstrate knowledge of developmentally appropriate health care which promotes safety and security, and optimises the health of children
- Identify the key aspects of a safe, initial assessment of a child or young person in order to undertake a developmentally appropriate, comprehensive health assessment of the child and their family/whānau
- Demonstrate the application of critical thinking as it relates to a child or young person's history and physical findings, to ensure timely and appropriate referral
- Discuss the importance of preparing children and their families/whānau for recommended procedures
